COMPANY OVERVIEW

Eat Away aims to be the nation's leading destination for online ordering. In essence the company will offer an online ecommerce portal which interlinks household consumers and suppliers (restaurants, caterers & fast-food joints). The portal will list all the products given by suppliers. It will also list the menu cards provided by suppliers with respective prices of food.

The company's mission is to provide Eat Away users with fast, convenient delivery without ever having to pick up the phone.

For customers, Eat Away will revolutionize ordering out. Customers no longer have to wait on hold, repeat their addresses or worry about getting wrong orders. Instead, Eat Away users can order exactly what they want, whenever they want with just a few clicks at their computers.

Eat Away connects users with local merchants and restaurants in the neighborhoods.

Eat Away plans to have a network of nearly 10,000 restaurants, caterers and other local merchants nationwide. Operations will start from Chennai to New Delhi, including Mumbai, Kolkata, Hyderabad and Bengaluru.
